# Introduction

Tripan®

## Preface

Thank you for choosing Swiss Made quality tools! These tools have a reputation which is not to be made any more and this since 1934! Precision, quality and reliability are the key words of these Swiss Made tools.

This catalog is primarily intended for users of Tripan® and Supercoup® tooling. It will provide you with useful technical information and show you the current possibilities for assembling the various elements.

The Tripan® brand and its catalog are constantly evolving. We welcome your comments for improvement (corrections, missing information, photos, information on use or tooling ideas). These can be posted directly on the TRIPAN.ch website. Thank you in advance.

Tripan® wants to be close to its customers, close to the technical reality and wants to evolve to fully meet your expectations.

Good machining! Good turning! Good milling! Good grinding!

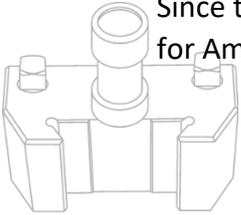

# History

1940

## First Tripan plans according to the archives of SwissKH Sàrl

Since then, Prematex SA has manufactured tooling for Europe under the name Tripan® and for America under the name Levin®. Levin is a lathe manufacturer based in Santa Fe.

1993

## Dissolution of the company Prematex SA

The company Prematex SA is dissolved and Antoniazza Mécanique SA takes over the Tripan and Supercoup products with brio. It is at this time that the trademarks Tripan® and Supercoup® are officially registered.

2015

## Registration of the SwissKH® trademark

The founder of SwissKH Sàrl Bryan Gosparini registered the brand SwissKH® in 2015. He wanted to put a name to what he was doing for passion, the renovation of old machines. The Swiss Know-How was a perfect fit, the SwissKH® brand was born.

2017

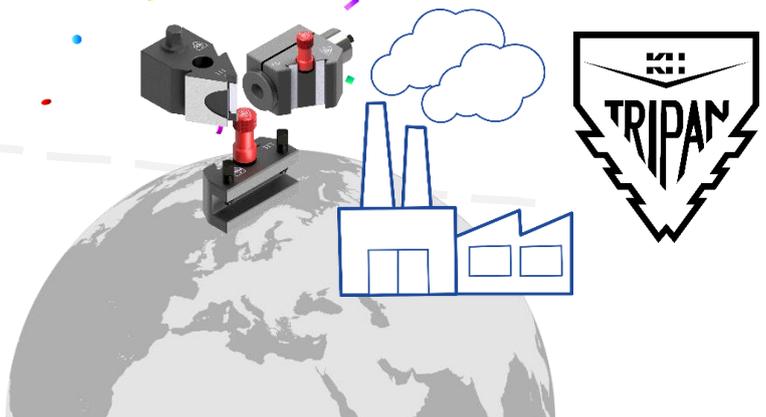

## Production shutdown

Antoniazza Mécanique SA, at the forefront of machining, stops producing Tripan and Supercoup in order to centralize its efforts. It seeks to give back and in its quest finds the person motivated to continue a living legend of precision. SwissKH Sàrl was born.

2018

## Takeover of the brands by SwissKH and resumption of production

SwissKH Sàrl, based in Switzerland, invests, reinvigorates its brands and makes an important communication around the brand. The return is positive and gives a new impetus to production. The brands are very successful and the company innovates every day to improve its products.

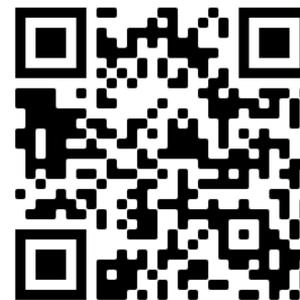

SwissKH is present on social networks !

## Examples of Tripan® colored nuts

## Benefits of Tripan® tooling

Fits all lathes

Fast start-up

High clamping precision

Easy cleaning

Handy and fast thanks to its dovetail

Resistant to wear

Tripan® toolholders allow excellent quality machining thanks to their high rigidity. Their excellent repeatability ensures precise work in case of frequent toolholder changes. Its durability is well proven, meeting the brand's economic and ecological objectives.

## General information

The **Tripan® range** is composed of the following **series**: 00, 0, 1, 2, 3 and 4.

### Compatibility of toolholders with toolposts :

**Series 00 and 0 toolholders** are only compatible with their **respective toolpost**.

**Series 1 toolholders** mount on **Series 1** and **Series 2 toolpost**.

**Series 2 toolholders** mount on **Series 2, Series 3,** and **Series 4 toolposts** (currently only available to order).

**Series 3 toolholders** mount on **Series 3** and **Series 4 toolposts** (currently only available to order).

**Series 4 toolholders** mount on **Series 4 toolposts**.

Currently, only series 0 and 1 have colored adjusting nuts. These will soon be available for the 00, 2, 3 and 4 series as well.

Series 00

The **Tripan® 011 toolpost** provides excellent machining quality thanks to its high rigidity. Its excellent repeatability ensures precise work with frequent toolholder changes. Its durability is well proven.

This toolpost accommodates the **00 series** toolholders.

The **Tripan® 011** toolpost consists of a clamp body with an integrated clamping lever and a **Tripan® 1209** hex key.

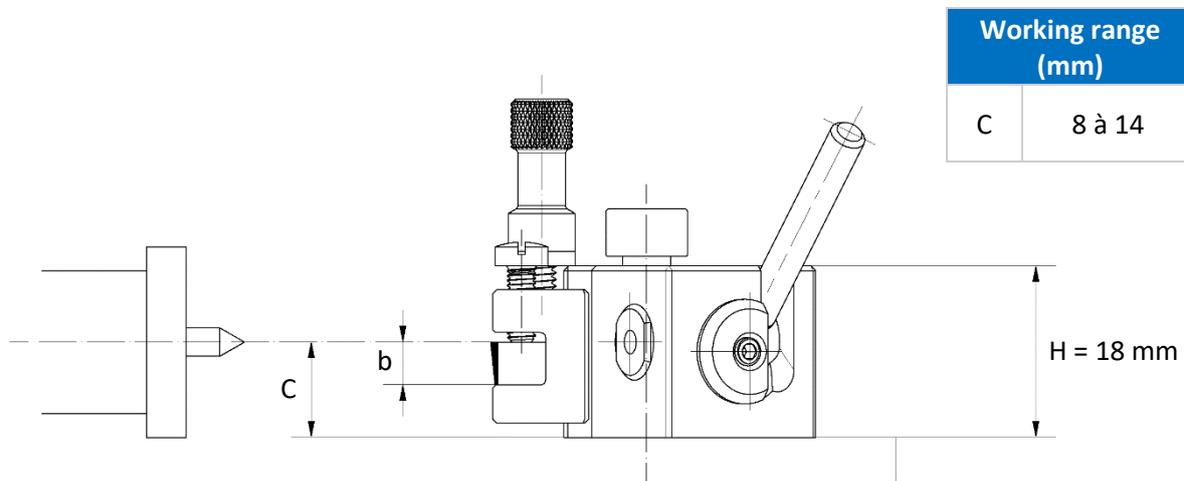

By default, the **Tripan® 011** toolpost includes a **Tripan® 011-05** tie rod nut. However, other tie rod nut models are available to adapt the assembly to different machines according to your needs.

# Tripan® 111 toolpost

# 1000020

S SHOP

The **Tripan® 111 toolpost** provides excellent machining quality thanks to its high rigidity. Its excellent repeatability ensures precise work with frequent toolholder changes. Its durability is well proven.

This toolpost accommodates the **1 series** toolholders.

The **Tripan® 111** toolpost consists of a clamping body, a **Tripan® 1220** clamping lever and a **Tripan® 1201** clamping key.

The **Tripan® 111S** clamping element set includes a tie rod and a hexagonal key in addition to the **Tripan® 111**.

The **Tripan® 111S-U** toolpost is identical to the **Tripan® 111S** with the exception of the clamping body which has an undercut on its underside for compatibility with Unitor lathes. Other pulling assemblies are available as well as a **Tripan® 111-30** centering disc to adapt the Series 1 toolpost to different lathes.

# Tripan® 211 S toolpost

# 1000069

S SHOP

The **Tripan® 211 S toolpost** provides excellent machining quality thanks to its high rigidity. Its excellent repeatability ensures precise work with frequent toolholder changes. Its durability is well proven.

This toolpost mainly accommodates **series 2** toolholders. It can also accommodate **series 1** toolholders.

The **Tripan® 211 S** toolpost consists of a clamping body, a **Tripan® 1203** clamping lever and a **Tripan® 1230** clamping key. The Tripan® 211 S toolpost includes a **Tripan® 1211** centering disc as standard.

The **Tripan® 211 S SV125** and **Tripan® 211 S SV150** toolposts include a tie rod in addition to the **Tripan® 211 S**. These two toolposts are respectively adapted for the **Schaublin® SV125** and **SV150** lathes.

# How to sharpen the Supercoup® blade

## Correct use of the Supercoup® blade

In order to achieve a good chip flow and a clean surface all the way to the center, the crosscut blade should be sharpened at an angle of 5-8° and the front face at about 5°.

# 1000846

On order

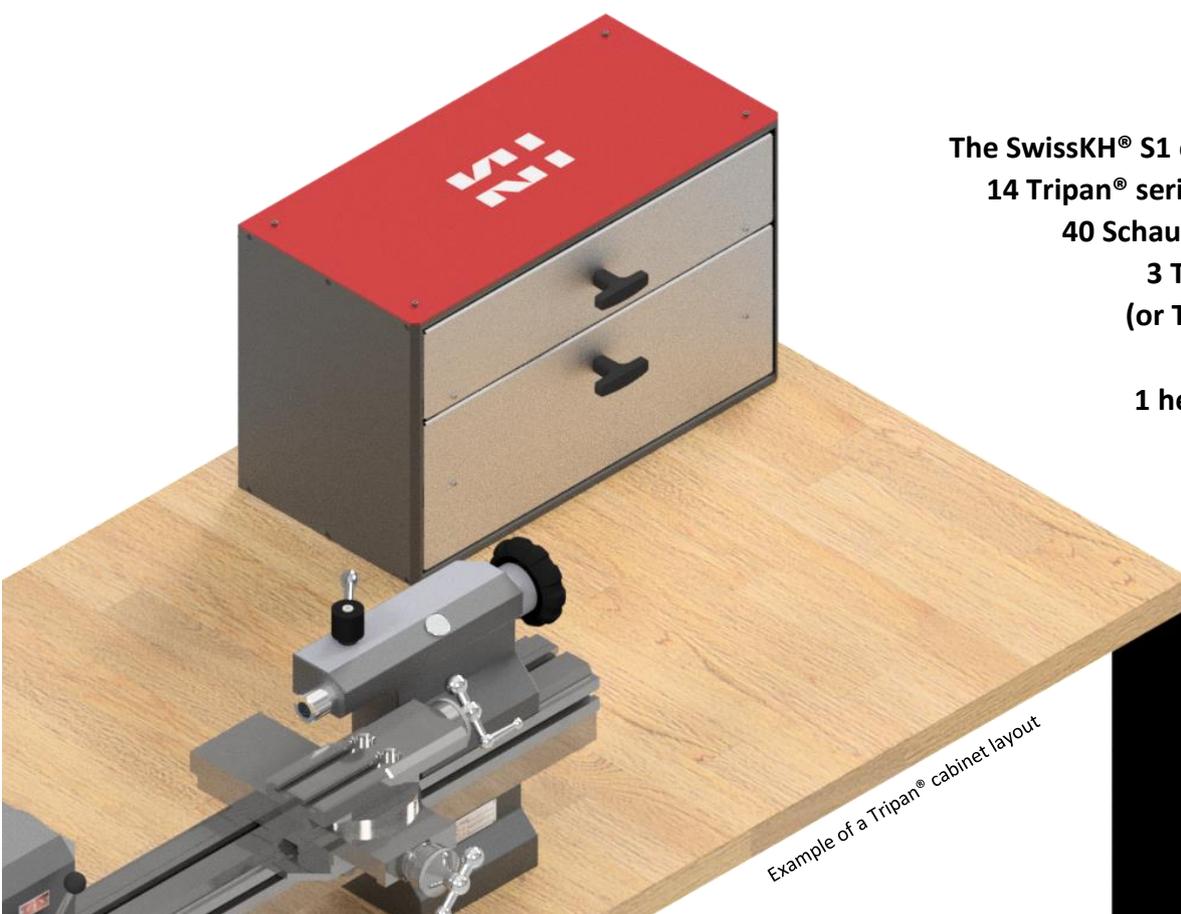

The SwissKH® S1 cabinet was custom designed to facilitate the storage of Tripan® toolholders and Schaublin® collet. This keeps the workshop tidy and allows machining operations to run smoothly. The SwissKH® S1 cabinet also allows the toolholders and collet to remain clean and in good condition.

## Storage space

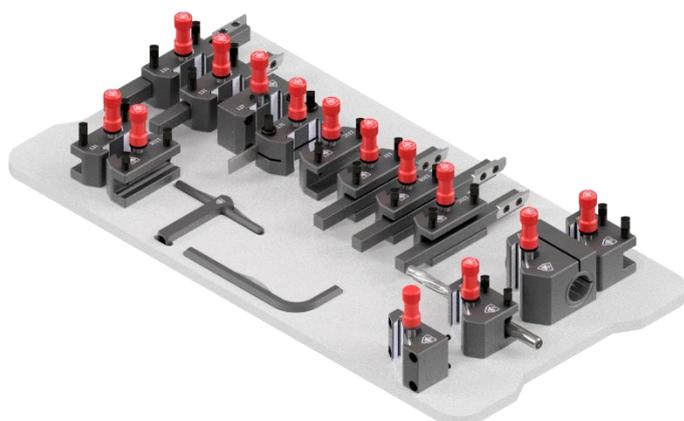

The SwissKH® S1 cabinet can store  
**14 Tripan® series 1 toolholders,**  
**40 Schaublin® W20 collet,**  
**3 Tripan® tailpieces**  
**(or Tripan® mandrels**  
**or bit cones),**  
**1 hexagonal key and**  
**1 wrench**

Sold without  
 toolholder,  
 without collet,  
 without tailstock

Accessories

Example of a Tripan® cabinet layout

## Tripan® serie 1

The SwissKH® S1A1 storage unit can hold  
**10 Tripan® toolholders (straight),  
 4 Tripan® toolholders (30°),  
 1 Tripan® wrench and  
 1 hexagonal key.**

## Materials

The resin material and the shapes are ideal to ensure a **clean environment**, whether in general mechanics, watchmaking or micromechanics dedicated to the medical field. These storage units will bring you satisfaction.

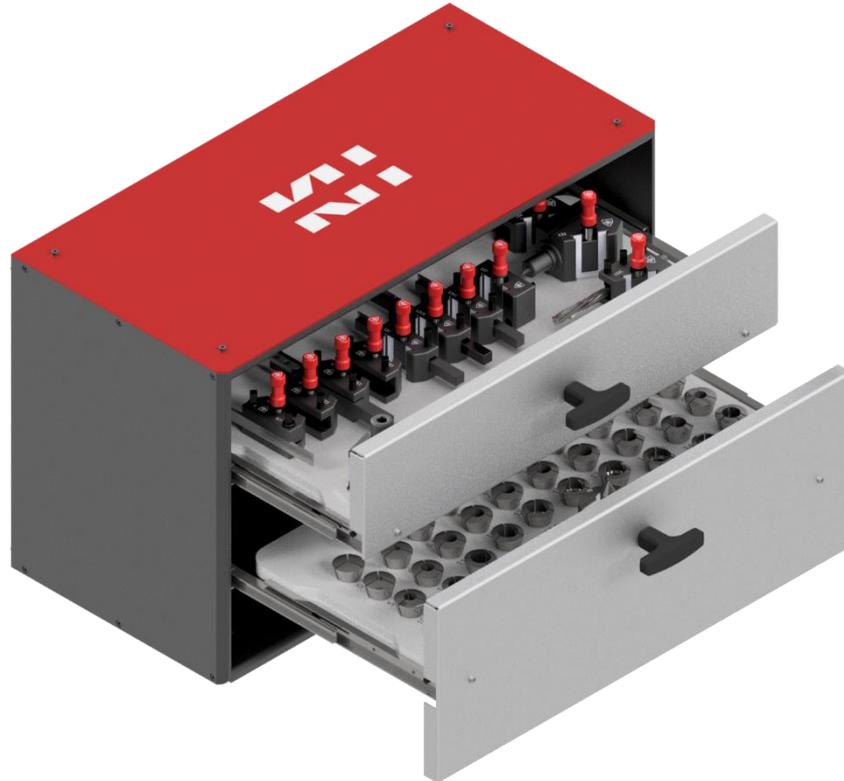

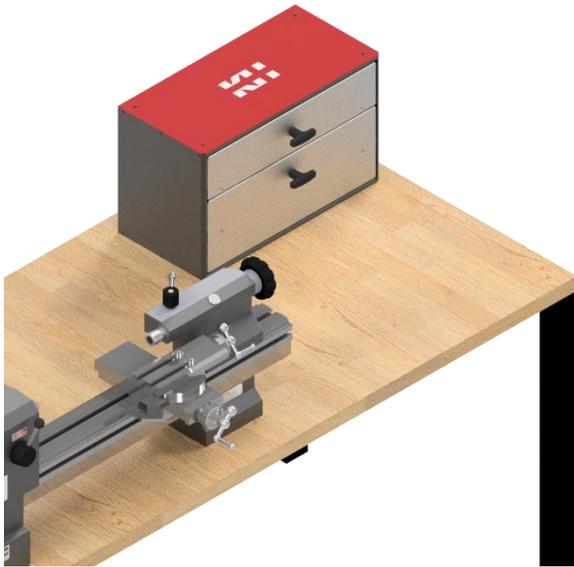

## Collet

The SwissKH® S1Pi1 allows to store  
**40 Schaublin® W20 collet  
 (ø0.5 to 20 mm) and  
 3 Tripan® tailpieces  
 (or Tripan® chucks or Tripan®  
 morse taper tool).**

## Layout

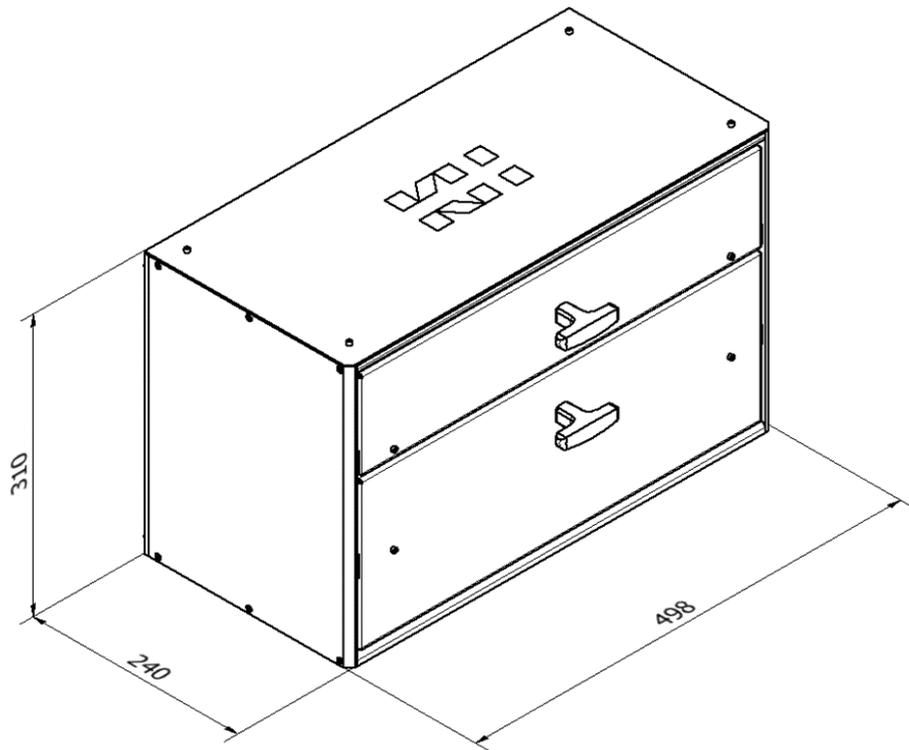

The SwissKH® S1 cabinet can be installed in various locations in your workshop. It has been developed to fit the top or bottom of your workbench.
